

Dropping Packing Technology

U-PACK YZ-CLD SERIES Dropping Case packer

DROPING® Dropping Case Packer

Dropping Case Packer has high compatibility, can be applied to bag products, special bottles or large containers. According to the packing requirements, products are transferred above the cases, automatically in arrangement, to ensure that packaged products drop into the cases. This machine adopts PLC and touch screen control, equipped with alarm device of lacking bottles, no bottle no packing. It is a standalone top load case packing system for packing rigid containers at high speed. It features heavy duty welded tubular steel construction and fast changeovers with modular slide-in packing heads and quick-clamp product lane guides.
